

How to check your data on the IATI Dashboard

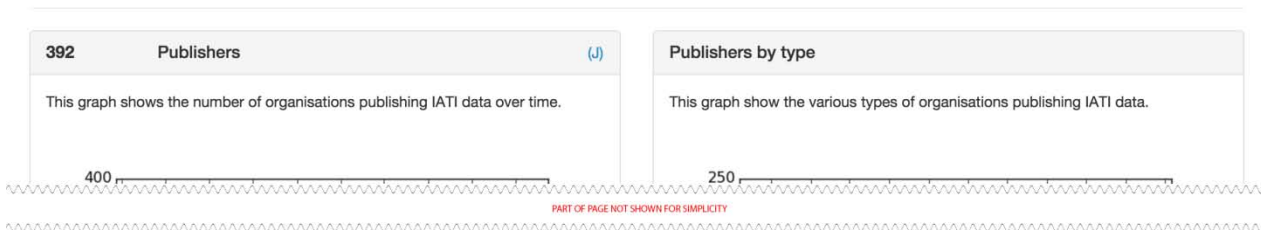

1. Go to <http://dashboard.iatistandard.org/publishers.html> and the following page will appear:

IATI Publishers

How many organisations are publishing IATI data?

Publishers represent organisation accounts in the IATI Registry.

List of current active IATI publishers. Click on the publisher name for more details.

[\(This table as CSV\)](#)

Click the \updownarrow icons to sort the table by a column. Selecting further columns whilst holding the shift key will enable secondary (tertiary etc) sorting by the desired column/s.

- To check if your data is missing or incorrect, scroll down to the 'Data Quality' section. If this page has a '**Files Failing Validation**' table as seen in the screenshot below, please email AidStream: support@aidstream.org, simply letting them know that this table appears on your organisation's page. They will reply with assistance on making the corrections listed in the table.

- You will also need to check your organisation's '**Codelist Values**' table by scrolling further down the page. Look at the column called '**Values not on Codelist**' and if any values appear **that are not '0'** (see screenshot below), this means you have published invalid data. Again, please email AidStream support@aidstream.org to simply let them know that these values appear and they will assist you in making the corrections needed.
